

Christos Tzoras

Data Scientist & AI Engineer

Athens, Greece | Mobile: +30 6947637240 | E-mail: xtzoras@gmail.com

Military Service: Fulfilled | Date of Birth: 16-05-2000

LinkedIn: <https://www.linkedin.com/in/christos-tzoras>

Website: <https://christostzoras.github.io/>

I'm a passionate Data Scientist and aspiring AI Engineer with a strong background in machine learning, statistical analysis, and data visualization. I enjoy turning raw data into actionable insights and building intelligent, data-driven solutions. I'm particularly interested in developing AI applications, machine learning models, and scalable systems that solve real-world problems and support better decision-making.

EDUCATION

University of Piraeus

Piraeus, Greece

MSC in Applied Statistics

October 2023 – September 2025

- *Specialization in Data Science and Biostatistics.*
- *Relevant Coursework: Data Science using Statistical Packages (IBM SPSS, R), Statistical Machine Learning (R, PYTHON), Statistical Tools in Data Mining (Python, Machine Learning, Clustering, Classification).*

University of Piraeus

Piraeus, Greece

BSc in Statistic and Insurance Science

September 2018 – July 2023

- *Relevant Statistic Coursework: Statistics I&II, Regression Models, Biostatistics.*
- *Relevant Programming Coursework: Statistical Programs I&II (IBM SPSS, R, PYTHON), Data Management (SQL).*

EXPERIENCE

KPMG Company

Athens, Greece

3rd year Associate Data Scientist in Analytics & AI Hub

March 2026 – Present

PwC Company

Athens, Greece

Associate Data Scientist in Analytics & AI Hub

April 2024 – March 2026

PERSONAL PORTFOLIO – GITHUB

Fake News Detection on Social Media - Thesis.

September 2025

For this analysis, I developed a multi-agent fake news detection system using Flowise to orchestrate GPT 4o-mini agents with access to external web search API's (Google & Serper). The system combined prompt-engineering agents for classification, scoring (bias, emotion, credibility), and source quality evaluation, producing structured, explainable outputs.

Fake News Detection using Machine Learning.

March 2025

Developed a comprehensive fake news detection system combining keyword analysis, sentiment analysis, sensationalism detection, and machine learning classifiers (Logistic Regression, Random Forest).

Statistical Tools in Data Mining.

February 2025

For this analysis, I utilized the Adult Income Dataset from the UCI Machine Learning Repository in order to classify individuals based on their income level as either above or below \$50,000 per year.

We made use of

- 1) Clustering Analysis Algorithms such as: K-Means, Agglomerative.
- 2) Classification Analysis Algorithms such as: Logistic Regression, Random Forest, SVM, Gradient Boosting, MLP.

PROFESSIONAL CERTIFICATIONS & SEMINARS

- **Artificial Intelligence Applications (150 hours)** –UCERT January 2026
- **Azure Data Fundamentals (DP-900)** –Microsoft February 2025
- **Cloud Practitioner (CLF-CO2)** –Amazon. September 2025
- **Azure AI Fundamentals (AI-900)** –Microsoft. May 2025
- **Certificate in IT and computer handling.** – University of Piraeus. July 2023
- **Certificate Computer Knowledge.** – National Organization for the Certifications and Professional Guidance. May 2020

COMPUTING SKILLS

- *Proficiency in MS Office Word – Excel – PowerPoint – Power BI, IBM SPSS, R, PYTHON, SQL, Azure, Microsoft Fabric, Docker*

LANGUAGE SKILLS

Greek (Native), English (Fluent), Deutsch (Intermediate)

INTERESTS

Boxing, Football Data, Basketball Data
